

FAIR HANDELN.
BESSER LEBEN.

To whom it may concern

As a Fair Trade Cooperative we are working as a recognised fair trade importer in Germany since our founding in 1988. When joining WFTO in 1991 (at that time it was still called IFAT) we are also visiting and checking our 60 producer partners worldwide against the existing and recognised Fair Trade criteria.

We have since 1989 a long-term partnership with Profairtrade Development Enterprise in the Philippines. They are for us a special partner as they show that fair trade is more than buying and selling fair traded products. They have the idea of a developmental fair trade which is specially focused on the people. We very much support this idea.

Me and others from our WeltPartner eG has visited and has evaluated Preda and we are satisfied with the results so that Profairtrade Development Enterprise is recognized by our WeltPartner eG as a fair trade organization practicing Fair Trade criteria in their daily work.

This visits of our cooperative at Profairtrade Developments Enterpris is part of our obligation to check those partners who are not certified by FLO our WFTO against the WFTO standards – this procedure is done according to the WFTO guarantee system.

We are quite happy to work with a partner like Profairtrade Developments Enterprise and are looking forward for future sucess of small scale farmers and produders in the Philippines.

With best regards
